### DETAILED ACTION

Claims 1-28 are pending and subject to restriction requirement.

#### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to a method for promoting dedifferentiation of pancreatic cells, classified in class 435, subclass 377, for example.
- II. Claims 14-26, drawn to a method for obtaining pancreatic islets cells, classified in class 435, subclass 325, for example.
- III. Claims 27, drawn to a method for providing islet cells, classified in class 435, subclass 373, for example.
- IV. Claim 28, drawn to a method of treating a subject having pancreatic disorder, classified in class 424, subclass 9.1, for example.

The inventions are distinct, each from the other because of the following reasons:

The inventions of Groups I, II and III are distinct because they are directed to different method comprising different active steps of obtaining, contacting and proliferating different cells and components. The inventions of Groups I -III and the invention of Group IV are distinct because they are directed to different method drawn to an *in vitro* application and an *in vivo* administration various pancreatic cells. The claimed methods have acquired a separate status in the art as shown by their different classification, they are drawn to recognized divergent subject matters and the search required for Group I is not related or required for Group II or Group III. And the *in vivo* and *in vitro* methods as intended would require consideration of distinct protocols of applications and/or administrations with regard to sites of applications, to

subject/cells under treatment, to dosages, to effects, etc. Thus, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
